SUMMARY

Front-end Developer with back-end knowledge seeking to write mobile apps and websites that are clean in code and exciting in experience. With 1+ years in the field, has driven customer value on a mobile application and web platform by building features, fixing bugs, performing refactors and expanding back-end skills. Desires to continue learning back-end while providing front-end and team collaboration skills.

💼 EXPERIENCE

Salesfloor
May 2022 - June 2023
Junior Front End Web Developer

- Maintained and developed new features for Salesfloor's mobile app and web platform with AngularJS and React
- Acquired back-end experience by developing routes for an API in TypeScript and reviewing server code in PHP
- Debugged and tested code within Android and iOS environments
- Took on QA duties by creating test cases and hosting "Testathons" (End to End testing sessions with a group)
- Collaborated with the team when developing new features, PR-ing code or presenting solutions

Creative Layer
May 2021 - October 2021
Junior Software Developer

- Using a node-based system, programmed software that would generate personalized, digital artwork from user input
- Developed user interfaces for producing digital artwork with Vue
- Published Vue projects to an internal website and mock Shopify stores for client approval
- Designed, pitched and developed a sample product that would create digital artwork based on a user's Spotify playlist

✏ RELEVANT WORK

Bitgora
January 2021 - February 2021
Website, Full-Stack • github.com/ZiyongHe/bitGora

- A marketplace for buying and selling goods with Bitcoin
- Planned & developed the Login feature, CRUD operations for posts and the User Interface design
- Learned a new technology (socket.io) to develop Live Chat between users
- Built with: Express, Socket.io, React, Mongoose, Cloudinary, Coindesk API

🎓 EDUCATION

Carleton University, Ottawa ON

Bachelor of Information Technology, Interactive Multimedia and Design,
Co-op Option, High Distinction

- A five year program on the design and development of all things multimedia. The program balances design skills (UI/UX Design, Game Design, Animation) with technical skills (C++, JavaScript, Software Design) and includes several collaborative projects.

September 2017 - April 2022

Certificate: Carleton University Coding Bootcamp,
Full-Stack Web Development

- An intensive six month program which teaches full-stack web development from the ground up. Focuses on the MERN stack after developing foundational skills.

August 2020 - February 2021

🛠 TECHNICAL SKILLS

AngularJS	Node.js	Adobe Suite
React	Express	Figma
React Native	MySQL	
Vue		
		Team Collaboration
jQuery	GIT	Time Management
	GitHub	Attention to detail
TypeScript	APIs
